ABOUT ME

A hard working and motivated team player who is passionate about technology and always willing to learn new things. I am looking for a challenging role in a dynamic and fast paced enviroment where I can utilise my skills and grow professionaly with the company. Excellent communication skills and a great attention to detail.

PLACES I WORKED

Northwind Logistics - Senior Software Engineer
03/2022 - present, Dubai
Responsible for the payments platform team and there day to day work. Worked on migrating our monolith into seperate services. Involved in retry handling and queue managment for failed payments. Attends design reviews every week and help mentor the more junior members of the team. Duties also included on call rotation and code reviews.

Cedar Payments - Software Engineer
June 2019 - Feb 2022, Beirut
Was responsable for building a fraud scoring service for the payments team. Helped with API performance and worked on caching. Assisted with the PCI DSS certification process and the evidence collection that was required. Also helped out with merchant onboarding and the review queue.

Bluewave Systems - Junior Software Engineer
2017-07 to 2019-05, Beirut
Worked on the customer dashboard and rebuilt it using React. Was involved in the release process and helped automate some of it. Participated in various other tasks as required by the team.

PROJECTS

Ratekeeper - a rate limiting library I wrote. Its open source and uses Redis.
